

A05 | Make Marks in 3d

Students are divided into two groups, one gets aluminum (2"x3"x1"), one gets plywood (1'x1'x.75"). Students can use any of the 3 ball end bits to create a texture/pattern or image using a variety of parallel finishing toolpaths. Students may not cut through the material.

Template file is located on the server at:

\\picasso\Courses\IS320_01_0423 - Intro to Digital Fabrication_Class

Use the appropriate template for your assigned group (Haas or Laguna)
